

Overview

IntelliTrack's **ISRP** (Inventory, Shipping, Receiving, Picking) is designed to maintain inventory in a variety of business environments. This user-friendly inventory tracking system combines state-of-the-art barcode data collection on your portable data collection terminal, with a sophisticated Windows-based inventory management program for your PC.

ISRP Inventory effectively maintains your inventory with physical inventory and cycle counting capabilities. **ISRP Receiving** can operate as a standalone application by using the Receiving form or with your existing purchase order system to import open order details. **ISRP Picking** can operate standalone by using the Picking (Customer Order) form or with your existing customer order system to import open order details. **ISRP Shipping** validates picked order details to packing box and generates shipping labels.

Who uses IntelliTrack's ISRP Solution?

IntelliTrack's **ISRP** is ideal for small to mid-sized warehouse operations. When a "Bigger WMS" is just too much, ISRP is just "right". The application is comprised of four fully integrated functions; Inventory, Shipping, Receiving and Picking.

Part #	Description	Notes
ISRP-000-S1	IntelliTrack ISRP, single	Includes 1 workstation and 1 batch portable data collection terminal licenses.
ISRP-000-S3	IntelliTrack ISRP, network	Includes 3 workstation and 3 batch portable data collection terminal licenses.
